

Essay Writing

COVID - 19 , Coronavirus

Life is a journey. It is full of ups and downs. We learn many new things everyday. Every new day brings new tasks and challenges in our life. But this time, the whole world is suffering from a new kind of virus, which has been considered a global crisis by the World Health Organisation (WHO).

A new pandemic, COVID-19 or Novel Coronavirus, has been discovered and it is spreading throughout the world very quickly. It was first discovered in Wuhan, China on 29th December, 2019. It was declared as a pandemic on 11th March, 2020. No one knows, the actual cause of spreading of this virus, but there are many theories about this topic. Some say that it is a biological weapon launched by China on its

rival nations. Some say that it is a virus from bats as the virus originated from the sea food market of Wuhan, China. But the real cause is hidden from the world.

COVID-19 has effected a large number of people all over the world. In the beginning Italy and Spain were the most effected nations. America was also effected by this global crisis. To prevent this virus from spreading and effecting more and more people, a lockdown was the only way. So, the whole world was put under a lockdown for nearly 6 months.

It was found that the main reason of exposure to coronavirus was the transfer of virus germs from one person to another by touching each other. This thing made this virus the different virus. WHO gave issued guidelines for people. The three most important steps are, washing hands for at least 20 seconds, wearing mask while going outside, and maintaining social distance.

Till now, Coronavirus has effected 41.9 M cases people in the world. 1.14 M people are dead due to this pandemic. But many people have recovered from this pandemic too. Total 28.4 M people have defeated this virus. Only Russia is the country, which has successfully found the COVID vaccine, Russia had named the vaccine as SPUTNIK-V.

In India, the recovery rate is more than any other country in this world. The doctors and scientists estimate that this kind of virus has first touched the Indians, that's why the bodies of Indians is producing the antibodies that can fight virus. The symptoms of this virus are similar to malaria, so the infected people are given Hydroxy Chloroquine. But this is not the real cure of this virus.

During this pandemic, the doctors, nurses, wardboys and other staff of hospitals have been our only courage. They have been more than God for us, as they are treating the corona patients and saving their lives. During this COVID-19 lockdown, their is a great impact on

the environment. There has been a great drop in air pollution levels in Delhi and Mumbai.

Due to this lockdown, the schools and colleges were closed. Our teachers did a great job by using technology to educate their students. They used to take online classes, so that the children get education.

So at last, I would like to appreciate all the people, and especially our doctors and teachers for their work. If this virus is dangerous, then our COVID-19 warriors are the cure of this virus. I pray to God, that all the people in this world stay safe and God bless them all.
